With the decision to provide of a scholarly edition of the Works of John Wesley in the 1950s, Methodist Studies emerged as a fresh academic venture. Building on the foundation laid by Frank Baker, Albert Outler, and other pioneers of the discipline, this handbook provides an overview of the best current scholarship in the field. The forty-two included essays are representative of the voices of a new generation of international scholars, summarising and expanding on topical research, and considering where their work may lead Methodist Studies in the future. Winner, 2019 Anna Julia Cooper and C.L.R. James Award, given by the National Council for Black Studies The inspiring story of the black students, faculty, and administrators who forever changed America's leading educational institutions and paved the way for social justice and racial progress The eight elite institutions that comprise the Ivy League, sometimes known as the Ancient Eight—Harvard, Yale, Princeton, Penn, Columbia, Brown, Dartmouth, and Cornell—are American stalwarts that have profoundly influenced history and culture by producing the nation's and the world's leaders. The few black students who attended Ivy League schools in the decades following WWII not only went on to greatly influence black America and the nation in general, but unquestionably awakened these most traditional and selective of American spaces. In the twentieth century, black youth were in the vanguard of the black freedom movement and educational reform. Upending the Ivory Tower illuminates how the Black Power movement, which was borne out of an effort to edify the most disfranchised of the black masses, also took root in the hallowed halls of America's most esteemed institutions of higher education. Between the close of WWII and 1975, the civil rights and Black Power movements transformed the demographics and operation of the Ivy League on and off campus. As desegregators and racial pioneers, black students, staff, and faculty used their status in the black intelligentsia to enhance their predominantly white institutions while advancing black freedom. Although they were often marginalized because of their race and class, the newcomers altered educational policies and inserted blackness into the curricula and culture of the unabashedly exclusive and starkly white schools. This book attempts to complete the narrative of higher education history, while adding a much needed nuance to the history of the Black Power movement. It tells the stories of those students, professors, staff, and administrators who pushed for change at the risk of losing what privilege they had. Putting their status, and sometimes even their lives, in jeopardy, black activists negotiated, protested, and demonstrated to create opportunities for the generations that followed. The enrichments these change agents made endure in the diversity initiatives and activism surrounding issues of race that exist in the modern Ivy League. Upending the Ivory Tower not only informs the civil rights and Black Power movements of the postwar era but also provides critical context for the Black Lives Matter movement that is growing in the streets and on campuses throughout the country today. As higher education continues to be a catalyst for change, there is no one better to inform today's activists than those who transformed our country's past and paved the way for its future.

"Wesley and Methodist Studies " ("WMS") publishes peer-reviewed essays that examine the life and work of John and Charles Wesley, their contemporaries (proponents or opponents) in the eighteenth-century Evangelical Revival, their historical and theological antecedents, their successors in the Wesleyan tradition, and studies of the Wesleyan and Evangelical traditions today. Its primary historical scope is the eighteenth century to the present; however, "WMS" will publish essays that explore the historical and theological antecedents of the Wesleys (including work on Samuel and Susanna Wesley), Methodism, and the Evangelical Revival. "WMS" has a dual and broad focus on both history and theology. Its aim is to present significant scholarly contributions that shed light on historical and theological understandings of Methodism broadly conceived. Essays within the thematic scope of "WMS" from the disciplinary perspectives of literature, philosophy, education and cognate disciplines are welcome. "WMS" is a collaborative project of the Manchester Wesley Research Centre and The Oxford Centre for Methodism and Church History, Oxford Brookes University.

WINNER of 2017 AERA DIVISION J OUTSTANDING PUBLICATION AWARD This is both a personal book that offers an account of the author's own trans* identity and a deeply engaged study of trans* collegians that reveals the complexities of trans* identities, and how these students navigate the trans* oppression present throughout society and their institutions, create community and resilience, and establish meaning and control in a world that assumes binary genders. This book is addressed as much to trans* students themselves - offering them a frame to understand the genders that mark them as different and to address the feelings brought on by the weight of that difference - as it is to faculty, student affairs professionals, and college administrators, opening up the implications for the classroom and the wider campus. This book not only remedies the paucity of literature on trans* college students, but does so from a perspective of resiliency and agency. Rather than situating trans* students as problems requiring accommodation, this book problematizes the college environment and frames trans* students as resilient individuals capable of participating in supportive communities and kinship networks, and of developing strategies to promote their own success. Z Nicolazzo provides the reader with a nuanced and illuminating review of the literature on gender and sexuality that sheds light on the multiplicity of potential expressions and outward representations of trans* identity as a prelude to the ethnography ze conducted with nine trans* collegians that richly documents their interactions with, and responses to, environments ranging from the unwittingly offensive to explicitly antagonistic. The book concludes by giving space to the study's participants to themselves share what they want college faculty, staff, and students to know about their lived experiences. Two appendices respectively provide a glossary of vocabulary and terms to address commonly asked questions, and a description of the study design, offered as guide for others considering working alongside marginalized population in a manner that foregrounds ethics, care, and reciprocity.

This book provides a comprehensive explanation of how the Mormons have transformed from a hated and persecuted fringe group to a well-established world religion with viable candidates for all levels of American government.
