to algebra functions algebra class  
we cannot say that the equation  $x = y^2$  represents a function  
because when we input 4 for  $x$  we  
two different answers for  $y^2$  and  
2 therefore this does not satisfy  
the definition for a function "the  
value of the first variable

# Download File PDF Algebra 1 Unit 2

corresponds to one and only one value for the second value" we have more than one value for  $y$  hopefully with these two examples you now understand the.
