AS 2870-2011—Techstreet

The SRIA has received a number of enquiries on the requirements for bar chairs in residential slabs and footings. AS 2870 Residential slabs and footings does not currently reference AS/NZS 2425 Bar chairs in reinforced concrete — Product requirements and test methods because AS 2870 (2011) was published before the AS/NZS 2425 in 2015. The SRIA has submitted a proposal to incorporate AS/NZS 2425 into the next revision of AS 2870 to the Australian Standard Committee.

Bar chair requirements in residential slabs and footings

Residential Slab & Footings 2011 (AS 2870) This standard places particular emphasis on design for reactive clay sites susceptible to significant ground movement due to moisture changes. Due to Covid19, no collections will be made available from the Albert St office until further notice.

Residential Slab & Footings 2011 (AS 2870) | mbav.com.au

Abstract. AS2870-1996 " Residential Slabs and Footings — Construction " correlates depths of design suction change (H s) to regional climatic zones as delineated by the Thornthwaite Moisture Index (TMI).TMI is a measure of aridity, quantifying the cyclical wetting and drying of soils.TMI is a function of rainfall, potential evapotranspiration and soil water-holding capacity, and provides ...
