Africa is the continent where the first humans were born. They explored the vast land and produced the first tools. And although we migrated from that continent, we never completely abandoned it.

This book includes activities for seven civilizations of the ancient world.

Making learning fun and interactive builds excitement for your social studies students. This book includes game-formatted activities for the study of Ancient Civilizations such as ancient Mesopotamia, Egypt, India, China, Greece, and Rome. These hands-on activities are aligned to state and national standards and supports college and career readiness skills. The hands-on lessons foster engagement, teamwork, creativity, and critical thinking. In addition to history-based lessons, this resource includes grading rubrics and ideas for assessment. The games in Hands-on History Activities will help you take an active approach to teaching while inspiring your students to make their own explorations of history.

"If you think the history you were taught in school was accurate, you're in for a big surprise. This group of researchers blows the lid off everything you thought you knew about the origins of the human race and the culture we live in"--Cover p. [4].

A comprehensive account of how energy has shaped society throughout history, from pre-agricultural foraging societies through today's fossil fuel-driven civilization. "I wait for new Smil books the way some people wait for the next 'Star Wars' movie. In his latest book, *Energy and Civilization: A History*, he goes deep and broad to explain how innovations in humans' ability to turn energy into heat, light, and motion have been a driving force behind our cultural and economic progress over the past 10,000 years. --Bill Gates, *Gates Notes, Best Books of the Year* Energy is the only universal currency; it is necessary for getting anything done. The conversion of energy on Earth ranges from terra-forming forces of plate tectonics to cumulative erosive effects of raindrops. Life on Earth depends on the photosynthetic conversion of solar energy into plant biomass. Humans have come to rely on many more energy flows--ranging from fossil fuels to photovoltaic generation of electricity--for their civilized existence. In this monumental history, Vaclav Smil provides a comprehensive account of how energy has shaped society, from pre-agricultural foraging societies through today's fossil fuel-driven civilization. Humans are the only species that can systematically harness energies outside their bodies, using the power of their intellect and an enormous variety of artifacts--from the simplest tools to internal combustion engines and nuclear reactors. The epochal transition to fossil fuels affected everything: agriculture, industry, transportation, weapons, communication, economics, urbanization, quality of life, politics, and the environment. Smil describes humanity's energy eras in panoramic and interdisciplinary fashion, offering readers a magisterial overview. This book is an extensively updated and expanded version of Smil's *Energy in World History* (1994). Smil has incorporated an enormous amount of new material, reflecting the dramatic developments in energy studies over the last two decades and his own research over that time.

Includes Part 1, Number 2: Books and Pamphlets, Including Serials and Contributions to Periodicals July - December)

In 1177 B.C., marauding groups known only as the "Sea Peoples" invaded Egypt. The pharaoh's army and navy managed to defeat them, but the victory so weakened Egypt that it soon slid into decline, as did most of the surrounding civilizations. After centuries of brilliance, the civilized world of the Bronze Age came to an abrupt and cataclysmic end. Kingdoms fell like dominoes over the course of just a few decades. No more Minoans or Mycenaeans. No more Trojans, Hittites, or Babylonians. The thriving economy and cultures of the late second millennium B.C., which had stretched from Greece to Egypt and Mesopotamia, suddenly ceased to exist, along with writing systems, technology, and monumental architecture. But the Sea Peoples alone could not have caused such widespread breakdown. How did it happen? In this major new account of the causes of this "First Dark Ages," Eric Cline tells the gripping story of how the end was brought about by multiple interconnected failures, ranging from invasion and revolt to earthquakes, drought, and the cutting of international trade routes. Bringing to life the vibrant multicultural world of these great civilizations, he draws a sweeping panorama of the empires and globalized peoples of the Late Bronze Age and shows that it was their very interdependence that hastened their dramatic collapse and ushered in a dark age that lasted centuries. A compelling combination of narrative and the latest scholarship, 1177 B.C. sheds new light on the complex ties that gave rise to, and ultimately destroyed, the flourishing civilizations of the Late Bronze Age—and that set the stage for the emergence of classical Greece.

Ancient Civilizations offers a comprehensive and straightforward account of the world's first civilizations and how they were discovered, drawing on many avenues of inquiry including archaeological excavations, surveys, laboratory work, highly specialized scientific investigations, and both historical and ethnohistorical records. This book covers the earliest civilizations in Eurasia and the Americas, from Egypt and the Sumerians to the Indus Valley, Shang China, and the Maya. It also addresses subsequent developments in Southwest Asia, moving on to the first Aegean civilizations, Greece and Rome, the first states of sub-Saharan Africa, divine kings and empires in East and Southeast Asia, and the Aztec and Inka empires of Mesoamerica and the Andes. It includes a number of features to support student learning: a wealth of images, including several new illustrations; feature boxes which expand on key sites, finds, and written sources; and an extensive guide to further reading. With new perceptions of the origin and collapse of states, including a review of the issue of sustainability, this fifth edition has been extensively updated in the light of spectacular new discoveries and the latest theoretical advances. Examining the world's pre-industrial civilizations from a multidisciplinary perspective and offering a comparative analysis of the field which explores the connections between all civilizations around the world, this volume provides a unique introduction to pre-industrial civilizations in all their brilliant diversity. It will prove invaluable to students of Archaeology.

The companion to *Living in the Victory of Jesus!*: Bible Lessons to Deepen Faith, the Leaders Guide helps class leaders prepare to examine the lives of powerful biblical characters with students.
