Industry in the UK and in many other countries. It is also rapidly changing from what was essentially a craft industry, batch processing relatively small amounts of product, to a very highly automated one with continuously operating high speed production lines. In addition,

Download File PDF

Electronic Expansion Valve

Consumers have developed a greater expectation for consistently high standard products and coupled this with demands for such things as a more natural flavour, lower fat etc. The need for an increased knowledge of the scientific principles behind food processing has never been greater.

Within the industry itself, increased automation, company diversification and amalgamations etc. have meant that those working in it have often to change their field of operation.

Whereas twenty years ago, someone starting work in one branch of the food industry could expect, if he or she so

desired, to work there all their working lives, this is now seldom the case. This means that a basic knowledge of the principles behind food processing is necessary both for the student at university or college, and for those already in the industry. It is hoped, therefore, that this book will appeal to
