Detailed data on Environmentally related tax revenue is available on the OECD Statistical database; OECD database on Instruments used for environmental policy documents the use of environmentally related taxes (and a number of other environmental policy instruments). In addition to the revenues raised, the database gives information on the tax-base covered, the tax rates applied, important exemptions and refund mechanisms.

Environmental taxation - OECD  
Environmental tax. Environmentally related taxes are an important instrument for governments to shape relative prices of goods and services. The characteristics of such taxes included in the database (e.g. revenue, tax base, tax rates, exemptions, etc.) are used to construct the environmentally related tax revenues with a breakdown by environmental domain: energy products (including vehicle fuels); motor vehicles and transport services; measured or estimated emissions to air and water, ozone ...

Environmental policy - Environmental tax - OECD Data  
By putting a price on pollution, taxes and tradable permit systems incentivise emissions abatement at the lowest possible cost. The OECD's work on tax and the environment investigates to what extent countries harness the power of taxes and tradable permit systems for environmental and climate policy. Additional topics of expertise include the interaction between environmental taxation and the broader tax system, and the impacts of environmental taxes on competitiveness and on equity.

Tax and the Environment - OECD  
Taxation and Environmental Policies. The OECD has worked on issues related to environmental taxes for many years. From 1999 to 2000, it reviewed environmentally related taxes in OECD countries and prepared a report on Environmentally Related Taxes in OECD Countries: Issues and Strategies. The main lessons that can be drawn from this report are outlined below.

Taxation and Environmental Policies - OECD  
Environmentally related taxes are an important instrument for governments to shape relative prices of goods and services. The characteristics of such taxes included in the database (e.g. revenue, tax base, tax rates, exemptions, etc.) are used to construct the environmentally related tax revenues with a breakdown by environmental domain: energy products (including vehicle fuels); motor vehicles and transport services; measured or estimated emissions to air and water, ozone depleting ...

OECD iLibrary | Environmental tax  
OECD governments are increasingly using environmentally related taxes because they are typically one of the most effective policy tools available. Exploring the relationship between environmentally related taxation and innovation is critical to understanding the full impacts of this policy instrument - one potential facet of "green growth."

Taxation, Innovation and the Environment - OECD  
This paper argues that cost-benefit analysis (CBA) could enrich ex-post assessments of environmentally related tax policies, given that CBA provides decision makers with a broader perspective of social costs and benefits and allows the identification of potential trade-offs among policy objectives. This paper provides a concrete example of how policy analysts can use empirical programme evaluation studies to perform ex-post assessments of environmentally related tax policies.

Environment - OECD Data  
Environmentally-related taxes are taxes on energy use, motor vehicle taxes and other taxes on transport, and taxes on waste and plastic. Environmentally-related taxes, on average, account for only 6.7 percent of total tax revenue among OECD countries.

Countries Eye Environmental Taxation | Tax Foundation  
Luxembourg has made progress in decoupling environmental pressures from economic growth, treating wastewater and managing waste and materials. It has also positioned itself as an international centre for green finance. Yet, it remains one of the most carbon- and material-intensive economies in the OECD. The country is a crossroads for freight traffic and attracts thousands of daily cross ...

The environmental tax and subsidy reform in Mexico OECD Taxation Working Papers Working papers from the Centre for Tax Policy and Administration of the OECD that cover the full range of the Centre's work on taxation with the main focus on tax policy related issues.

This report draws on case studies to explore the relationship between environmentally-related taxation and innovation to see whether taxation can spur innovation and if so, what types.

This book provides a comprehensive discussion on the effectiveness of environmentally related taxes and their potential for wider use.

Survey of environmental tax instruments in use in OECD countries. It deals a.o. with policy trends, taxation of motor fuels and vehicle-related taxes, taxation of other energy products, taxation of emissions, environmental taxation of energy in Denmark, Finland, the Netherlands, Norway, and Sweden, environmental taxation of agricultural inputs, taxation of other goods and services, environmental provisions in direct taxation, landing charges and other taxation of air transport, water charges and taxes, and waste disposal and management charges.

This report analyses current use of environmentally related taxes in OECD Member countries. Focus is given to their environmental effectiveness. The report identifies obstacles to a broader use of such taxes -- in particular the fear of loss of sectoral competitiveness -- and ways to overcome them.

Most OECD countries have introduced various ecotaxes, but only a few are implementing comprehensive green tax reforms. This report reviews the 1997 situation and the lessons which can be drawn e.g. as to the competitiveness, social equity and employment implications of green taxes.

This report analyses the issues that arise before and during the introduction of environmental taxes and draws on the experiences of OECD Member countries implementing them.

This is the third Environmental Performance Review of Denmark. It evaluates progress towards sustainable development and green growth, with special features on waste, materials management and the circular economy and chemicals management.

Taxing Energy Use (TEU) 2019 presents a snapshot of where countries stand in deploying energy and carbon taxes, tracks progress made, and makes actionable recommendations on how governments could do better. The report contains new and original data on energy and carbon taxes in OECD and G20 countries, and in international aviation and maritime transport.
