Up the hill behind the pile are old mill ruins, and supposedly a steep trail to an upper mine and pile which we didn't take. Kid Facts - The Native Americans knew about the lead in the Wurtsboro hills but kept it a closely guarded secret form the pioneers. This mine is thought to be one of the oldest in NY going back to the 1600's.

New York - Rock Pups

The exposure in the mill before the installation of dust control equipment in 1964, was estimated to be 400 and 168 fibers per ml (all fiber ?5 ?m), respectively. Dust levels between 1965 and the closure of the mill in 1974 were estimated by McDonald et al. and Amandus et al. to ?20 and ?33 fibers per ml (all fiber ?5 ?m), respectively.

Colloquium Paper: A risk assessment for exposure to ...

Often, mine operations leach older mill tailings of suitably high enough residual copper content in situ. Since the mid 1980s, the industry has increasingly used a leach-solvent extraction-electrowinning process (SX-EW) for extracting copper from oxidized ores and mine wastes (U.S. EPA, August 1994b). The process reduces the reliance
