Take equation  $5a - 15 + 9a = 3a + 29$ . You want to solve for a, so you want to simplify the equation to find the value of a. First, subtract 5a from 5a and from 3a to cancel out the 5a. Now, your equation should look like:  $-15 + 9a = -2a + 29$ . Second, you are going to add 15 to -15 and to 29.

Algebra success for all Basic concepts and properties of algebra are introduced early to prepare students for equation solving. Abundant exercises graded by difficulty level address a wide range of student abilities. The Basic Algebra Planning Guide assures that even the at-risk student can acquire course content. Multiple representations of concepts Concepts and skills are introduced algebraically, graphically, numerically, and verbally-often in the same lesson to help students make the connection and to address diverse learning styles. Focused on developing algebra concepts and skills Key algebraic concepts are introduced early and opportunities to develop conceptual understanding appear throughout the text, including in Activity Labs. Frequent and varied skill practice ensures student proficiency and success.

- The only program that supports the Common Core State Standards throughout four-years of high school mathematics with an unmatched depth of resources and adaptive technology that helps you differentiate instruction for every student. \* Connects students to math content with print, digital and interactive resources. \* Prepares students to meet the rigorous Common Core Standards with aligned content and focus on Standards of Mathematical Practice. \* Meets the needs of every student with resources that enable you to tailor your instruction at the classroom and individual level. \* Assesses student mastery and achievement with dynamic, digital assessment and reporting. Includes Print Student Edition
