The Kawasaki KMX is a water-cooled 2-stroke motorcross bike. There are two versions, the KMX 125 cc and the larger 200 cc model under the KMX title. They both feature front and rear disc brakes, water-cooled engines, mono link suspension (Kawasaki's Uni-Trak system) and a power valve system (KIPS).

Kawasaki KMX - Wikipedia

In restricted (12bhp) form the 125 did 71mph and 50mpg, but most were easy to derestrict (once you'd passed your test, of course) at which point they were making 20bhp and would do an easy 80mph. The KMX200 didn't go that

The 200cc has stonger clutch springs, but if your using the 125 bottom end, id just order yourself a new clutch kit anyway. The exhaust is slightly different between the 125 and 200 and so is the diameter of the stinger. But an aftermarket can should mate up to the 200 front pipe easily enough.
