Mechanical reasoning tests are timed assessments and you will generally have around 20 to 30 minutes to answer 20 to 30 questions (so one minute per question). Questions are usually based around mechanical and physical principles and electrical concepts, but you may also be assessed on your spatial reasoning skills and basic mathematics.

[Free Mechanical Reasoning Test Questions To Practice \(2020\)](#)

In most of the cases, though, mechanical aptitude assessments come in the form of multiple-choice questions, where test takers are required to analyse a picture or diagram of an object and pick the right answer. A mechanical aptitude test typically covers mechanical reasoning, visual/spatial relations, gravity and/or tool knowledge. In the below table, you can find the types of questions to expect:

In a mechanical reasoning test, each question you are presented with an image that depicts a simple object or situation, often with labels or arrows to indicate motion or direction. You are then asked a question which requires the information in the image to answer, such as which object is the most stable, or which object will travel faster.

[Free Mechanical Reasoning Test | AssessmentDay](#)

Mechanical reasoning generally does not require verbal or numerical reasoning although variations exist that do. There are many topics that mechanical reasoning tests assess, for example electricity, pressure or optics. This short free mechanical reasoning test demonstrates some questions on gears, pulleys and forces.
