Everything we do online, and increasingly in the real world, is tracked, logged, analyzed, and often packaged and sold on to the highest bidder. Every time you visit a website, use a credit card, drive on the freeway, or go past a CCTV camera, you are logged and tracked. Every day billions of people choose to share their details on social media, which are then sold to advertisers. The Edward Snowden revelations that governments - including those of the US and UK – have been snooping on their citizens, have rocked the world. But nobody seems to realize that this has already been happening for years, with firms such as Google capturing everything you type into a browser and selling it to the highest bidder. Apps take information about where you go, and your contact book details, harvest them and sell them on – and people just click the EULA without caring. No one is revealing the dirty secret that is the tech firms harvesting customers' personal data and selling it for vast profits – and people are totally unaware of the dangers. You: For Sale is for anyone who is concerned about what corporate and government invasion of privacy means now and down the road. The book sets the scene by spelling out exactly what most users of the Internet and smart phones are exposing themselves to via commonly used sites and apps such as facebook and Google, and then tells you what you can do to protect yourself. The book also covers legal and government issues as well as future trends. With interviews of leading security experts, black market data traders, law enforcement and privacy groups, You: For Sale will help you view your personal data in a new light, and understand both its value, and its danger. Provides a clear picture of how companies and governments harvest and use personal data every time someone logs on Describes exactly what these firms do with the data once they have it – and what you can do to stop it Learn about the dangers of unwittingly releasing private data to tech firms, including interviews with top security experts, black market data traders, law enforcement and privacy groups Understand the legal information and future trends that make this one of the most important issues today

The purpose of this book is to explore the key substantive, methodological, and institutional issues raised by the proposed unitary EU patent system contained in EU Regulations 1257/2012 and 1260/2012 and the Unified Patent Court Agreement 2013. The originality of this work lies in its individual contributions and uniquely broad approach, taking six different (historical, constitutional, international, competition, institutional and forward-looking) perspectives on the proposed patent system. This means that the book offers a multi-authored and all round legal appraisal of the proposed unitary system from experts in patent law, EU constitutional law, private international law, and competition law, as well as leading figures

from the worlds of legal practice, the bench, and the European Patent Office. The unitary patent system raises issues of foundational importance in the fields of patent and intellectual property law, EU law and legal harmonization, which it is the purpose of the book to engage with. This is a work which will enjoy wide and enduring interest among academics, policy makers and decision makers/practitioners working in patent law, intellectual property law, legal harmonization, and EU law.

The public relations profession positions itself as expert in building trust throughout global markets, particularly after crisis strikes. Successive crises have tainted financial markets in recent years. Calls to restore trust in finance have been particularly pressing, given trust's crucial role as lubricant in global financial engines. Nonetheless, years after the global financial crisis, trust in financial markets remains both tenuous and controversial. This book explores PR in financial markets, posing a fundamental question about PR professionals as would-be 'trust strategists'. If PR promotes its expertise in building and restoring trust, how can it ignore its potential role in losing trust in the first place? Drawing on examples from state finance, international lending agencies, trade bodies, financial institutions and consumer groups in mature and emerging financial centres, this book explores the wide-ranging role of PR in financial markets, including: State finance and debt capital markets Investor relations, M&A and IPOs Corporate communications for financial institutions Product promotion and consumer finance Financial trade associations and lobbying Consumerism and financial activism. Far reaching and challenging, this innovative book will be essential reading for researchers, advanced students and professionals in PR, communication and finance.

On Liberty is the story of today's threats to our freedoms and a highly personal, impassioned plea in defence of fundamental rights, from Shami Chakrabarti, Britain's leading human rights campaigner On 11 September 2001, our world changed. The West's response to 9/11 has morphed into a period of exception. Governments have decided that the rule of law and human rights are often too costly. In On Liberty, Shami Chakrabarti explores why our fundamental rights and freedoms are indispensable. She shows, too, the unprecedented pressures those rights are under today. Drawing on her own work in high-profile campaigns, from privacy laws to anti-terror legislation, Chakrabarti shows the threats to our democratic institutions and why our rights are paramount in upholding democracy.
