The author brings post-impressionism to life: the different artistic groupings, the effects of contemporary writing, music and politics, the influence of Japanese art and 'primitive' sculpture, the spread of artistic practice into printmaking and many other important factors are vividly expounded.

Whilst Impressionism marked the first steps toward modern painting by revolutionising an artistic medium stifled by academic conventions, Post-Impressionism, even more revolutionary, completely liberated colour and opened it to new, unknown horizons. Anchored in his epoch, relying on the new chromatic studies of Michel Eug è ne Chevreul, Georges Seurat transcribed the chemist ' s theory of colours into tiny points that created an entire image. With his heavy strokes, Van Gogh illustrated the midday sun, whilst C é zanne renounced perspective. Rich in its variety and in the singularity of its artists, Post-Impressionism was a passage taken by all the well-known figures of 20th century painting - it is here presented, for the great pleasure of the reader, by Nathalia Brodtska I a.

The book of post-impressionists is some of the best known art in the world. Vincent van Goh was a post-impressionist painter, and so was Paul C é zanne! Readers learn all about these famous post-impressionists in this book alongside a friendly gallery worker guide. The main features and techniques of post-impressionism are covered, and activities help readers create their own post-impressionist masterpieces! Including examples of famous post-impressionist works, an explanation of what an art gallery is, and a quiz to aid in comprehension, this book is a great introduction to an important movement in art history.

Impressionism is the most famous artistic movement. But what appears today as a charming and exquisite landscape painting, was actually one of the first avant-garde movements whose members had decided to fight the values of traditional art. The impressionist outdoor paintings shocked the public by the technique used, but also by their apparent banality. As Monet, Sisley, Pissarro and many others sought to capture the ephemeral nature of light, the next generation would reject naturalism. Indeed, post-impressionists such as Gauguin, Van Gogh, C é zanne and Seurat favored the subjective rather than the objective and the eternal rather than the concrete. In doing so, they laid the formal foundations of 20th-century modern art. This book is a visual guide through the crucial moments in the history of art and the progression of the 19th-century to modernity.

A comprehensive introduction to the artistic movement known as post-impressionism, as well a collection of great post-impressionist works, each of which includes an explanatory caption.

"In 1910 the critic Roger Fry organized an exhibition at the Grafton Galleries, London, of avant-garde painting which included works by Cezanne, Van Gogh, Gauguin and Matisse. This exhibition became as important a landmark in the official histories of modern art as the subsequent Armory Show in America. These artists did not belong to a single unified movement defined or recognized at the time, and Fry, in a quandary as to what to call the exhibition, and losing patience at the last minute, said, "Oh, let's just call them Post-Impressionists; at any rate, they came after the Impressionists."" "In this way one of the important critical categories, one of the "isms" of modern art, was born. But "Post-Impressionism" was not a name which Van Gogh, Gauguin, Seurat or Cezanne or any artists of the period would have applied to themselves. The documents in this book, many of which appear in English for the first time, show how artists and critics in the aftermath of Impressionism did describe themselves: how they responded to tradition, to each other and to the kaleidoscope of the contemporary scene. This was a period of reconsideration, of moving on from aspects of Impressionism, and of coming to grips with the isolation that avant-garde art had imposed on the individual artist. It was a period in which the emphasis within Impressionism on the construction of painting purely by means of color had left artists with the question of how the power of this basic form related to their own feelings and to nature. New ideas were coming from poetry as well as painting that laid the basis for modernism." "These issues and the personal struggles of the artists themselves are revealed in their letters, and in the writings of friends and critics, many of whom, such as Mallarme, Laforgue, Huysmans, and Proust were novelists and poets. This book also includes commentaries from Rainer Maria Rilke, Virginia Woolf, and W. H. Auden as well as modern critics, artists, philosophers and art historians: Georges Bataille, Paul Klee, and Meyer Schapiro on Van Gogh; John Berger on Bonnard; Maurice Merleau-Ponty, Clement Greenberg, Adrian Stokes and Lawrence Gowing on Cezanne." "The text is illustrated with 119 colorplates and 125 black and white reproductions of contemporary photographs, cartoons, documents, prints and drawings."--BOOK JACKET.

The essays in this wide-ranging text capture the theoretical range and scholarly rigor of criticism that has fundamentally transformed the study of French Impressionist and Post-Impressionist art.

Relates the life, development, and art of the famous artist.

Within a year of closing the last Impressionist exhibition in 1886, a large and disparate group of movements had appeared, each with its own beliefs about the nature and function of art. From Neo-Impressionism to Symbolism, from Gauguin and van Gogh to Matisse and Munch, the program of 20th-century art was emerging. These individual styles are now collectively referred to as Post-Impressionism. This book imposes coherence and a sense of pattern upon this diverse mix of movements and individuals that reacted against the style and subject matter of the Impressionists. The sociohistoric background against which Post-Impressionism evolved and the international reverberations of the movement are presented. Special emphasis is given to the revolution that Post-Impressionism created in Russia, which had effects far beyond the confines of art.
