This book provides a comprehensive and systematic overview of the recent developments in cotton production and processing, including a number of genetic approaches, such as GM cotton for pest resistance, which have been hotly debated in recent decades. In the era of climate change, cotton is facing diverse abiotic stresses such as salinity, drought, toxic metals and environmental pollutants. As such, scientists are developing stress-tolerant cultivars using agronomic, genetic and molecular approaches. Gathering papers on these developments, this timely book is a valuable resource for a wide audience, including plant scientists, agronomists, soil scientists, botanists, environmental scientists and extension workers.

'Godan' is an epic in Hindi prose. It is the most famous work of Munshi Premchand. 'Godan' gives a vivid picture of the condition of Indian farmers during the author's lifetime. The novel is relevant today because the rural folks' problems still exist. Farmers have generally been exploited by money-lenders, government officials and superstitious community members. Hori, a well-off cultivator, suffers for his dependence on these exploiters. He works very hard, grows various crops, yet starves with his family because almost all his crops are given away to clear the creditor' dues. He efforts to protect his family dignity but fails because he was continuously exploited.

In their Second Edition of Cases in Intelligence Analysis: Structured Analytic Techniques in Action, accomplished instructors and intelligence practitioners Sarah Miller Beebe and Randolph H. Pherson offer robust, class-tested cases studies of events in foreign intelligence, counterintelligence, terrorism, homeland security, law enforcement, and decision-making support. Designed to give analysts-in-training an opportunity to apply structured analytic techniques and tackle real-life problems, each turnkey case delivers a captivating narrative, discussion questions, recommended readings, and a series of engaging analytic exercises.

The Shias of Pakistan are the world's second largest Shia community after that of Iran, but comprise only 10-15 per cent of Pakistan's population. In recent decades Sunni extremists have increasingly targeted them with hate propaganda and terrorism, yet paradoxically Shias have always been fully integrated into all sections of political, professional and social life without suffering any discrimination. In mainstream politics, the Shia- Sunni divide has never been an issue in Pakistan. Shia politicians in Pakistan have usually downplayed their religious beliefs, but there have always been individuals and groups who emphasised their Shia identity, and who zealously campaigned for equal rights for the Shias wherever and whenever they perceived these to be threatened. Shia 'ulama' have been at the forefront of communal activism in Pakistan since 1949, but Shia laymen also participated in such organisations, as they had in pre-partition India. Based mainly on Urdu sources, Rieck's book examines, first, the history of Pakistan's Shias, including their communal organisations, the growth of the Shia 'ulama' class, of religious schools and rivalry between "orthodox" "ulama" and popular preachers; second, the outcome of lobbying of successive Pakistan governments by Shia organisations; and third, the Shia-Sunni conflict, which is increasingly virulent due to the state's failure to combat Sunni extremism.

This book presents the example of how one of the greatest hadith scholars of the past century, Shaikh al-Hadith Muhammad Zakariyya, and other notable scholars, left their religious duties of teaching Qur'an and hadith to devote their time in austere devotion and worship of Allah in the blessed month. Despite his busy schedule and scholarly work of hadith, Shaikh al-Hadith Muhammad Zakariyya devoted the whole month of Ramadan to connect those who came to sit in his pious company with Allah and to ignite the flame of love of Allah, love for the Blessed Prophet (peace be upon him), and perpetual remembrance of Allah in their lives.This book is an excellent firsthand account of how the great scholars of Islam utilized each moment of this blessed month. It is an inspirational and motivational book which will, inshallah, change the way we view and utilize the blessed month of Ramadan.

The idea of Pakistan stands riddled with tensions. Initiated by a small group of select Urdu-speaking Muslims who envisioned a unified Islamic state, today Pakistan suffers the divisive forces of various separatist movements and religious fundamentalism. A small entrenched elite continue to dominate the country's corridors of power, and democratic forces and legal institutions remain weak. But despite these seemingly insurmountable problems, the Islamic Republic of Pakistan continues to endure. The Pakistan Paradox is the definitive history of democracy in Pakistan, and its survival despite ethnic strife, Islamism and deepseated elitism. This edition focuses on three kinds of tensions that are as old as Pakistan itself. The tension between the unitary definition of the nation inherited from Jinnah and centrifugal ethnic forces; between civilians and army officers who are not always in favour of or against democracy; and between the Islamists and those who define Islam only as a cultural identity marker.

This volume comprehensively reviews oncology in the precision medicine era of personalized care, latest developments in the field, and indications and clinical trials for the treatment of cancer with targeted therapies, immunotherapy, and epigenetic modulators. It thoroughly addresses concerns of various types of cancers including cancers of the head and neck, lung, colon, esophagus, bladder, pancreas, and breast; melanoma; multiple myeloma; hepatocellular carcinoma; renal cell carcinoma; and sarcomas. It is organized and written in a format that is easy to follow for both clinicians and non-clinical scientists interested in personalized medicine. Chapters cover the identification of the clinical problem and summary of recent findings, tumor biology and heterogeneity, genomics, examples of simple and complex cases, biological pathways, future clinical trials, and financial considerations. Oncology in the Precision Medicine Era: Value-Based Medicine will serve as a useful resource for medical oncologists and healthcare providers tailoring medicine to the needs of the individual patient, from prevention and diagnosis to treatment and follow up.

Now Filmed as 1947, a motion picture by Deepa Mehta Few novels have caught the turmoil of the Indian subcontinent during Partition with such immediacy, such wit and tragic power.
