Take the children in your life on their own journey of discovery: tag along with Ella, her impatient little brother Jake, and their Grandpa as they explore the outside, inside, and very, very top of the Gateway Arch, on the Mississippi riverfront in St. Louis, Missouri. While Jake just wants to get to the top as fast as possible, Ella is intent on impressing Grandpa with everything she has learned about the landmark and its history. Together, the family discovers

fascinating artifacts—a bison, a great grizzly bear, a tall statue of Thomas Jefferson—while Grandpa spins tales of his own memories, as a young man, of watching the Arch being built. More than just an architectural feat, the Arch embodies the history, culture, and spirit of westward expansion, exploration, and individual dignity. Don ’ t worry, they finally make it to the top . . . and what Jake wants then will resonate with your own young explorers!

Joe Garagiola remembers playing baseball with stolen balls and bats while growing up on the Hill. Chuck Berry had run-ins with police before channeling his energy into rock and roll. But not all the boys growing up on the rough streets of St. Louis had loving families or managed to find success. This book reviews a century of history to tell the story of the “ lost ” boys who struggled to survive on the city ’ s streets as it evolved from a booming late-nineteenth-century industrial center to a troubled mid-twentieth-century metropolis. To the eyes of impressionable boys without parents to shield them, St. Louis presented an ever-changing spectacle of violence. Small, loosely organized bands from the tenement districts wandered the city looking for trouble, and they often found it. The geology of St. Louis also provided for unique accommodations—sometimes gangs of boys found shelter in the extensive system of interconnected caves underneath the city. Boys could hide in these secret lairs for weeks or even months at a stretch. Bonnie Stepenoff gives voice to the harrowing experiences of destitute and homeless boys and young men who struggled to grow up, with little or no adult supervision, on streets filled with excitement but also teeming with sharpsters ready to teach

these youngsters things they would never learn in school. Well-intentioned efforts of private philanthropists and public officials sometimes went cruelly astray, and sometimes were ineffective, but sometimes had positive effects on young lives. Stepenoff traces the history of several efforts aimed at assisting the city ' s homeless boys. She discusses the prison-like St. Louis House of Refuge, where more than 80 percent of the resident children were boys, and Father Dunne's News Boys' Home and Protectorate, which stressed education and training for more than a century after its founding. She charts the growth of Skid Row and details how historical events such as industrialization, economic depression, and wars affected this vulnerable urban population. Most of these boys grew up and lived decent, unheralded lives, but that doesn ' t mean that their childhood experiences left them unscathed. Their lives offer a compelling glimpse into old St. Louis while reinforcing the idea that society has an obligation to create cities that will nurture and not endanger the young.

Assembled in honor of the two-hundredth anniversary of the birth of philanthropist and entrepreneur Henry Shaw (1800–1889), *St. Louis in the Century of Henry Shaw* is a collection of nine provocative essays that together provide a definitive account of the life of St. Louis during the 1800s, a thriving period during which the city acquired the status of the largest metropolis in the American West. Shaw, who established the Missouri Botanical Garden in 1859, was just one of the many immigrants who left their mark on this complex, culturally rich city during the century of its greatest growth. This volume examines the lives of a number of these men and women, from celebrated leaders such as Senator Thomas Hart Benton and the Reverend William Greenleaf Eliot to the thousands of Germans, African

Americans, and others whose labor built the city we recognize today. Leading scholars reconstruct and interpret the world that Shaw knew in his long lifetime: a world of contention and of creativity, of trendsetting developments in politics, business, scientific research, and the arts. Shaw's own story mirrored these developments. Born in Sheffield, England, he immigrated to the United States in 1819 and soon moved to St. Louis. Ultimately becoming a very successful businessman and philanthropist, he was a participant in and a witness to the vast economic and cultural transformation of the city.

Nowhere in America has the private place flourished as it has in St. Louis, and no private places have played a more important role in that city's or the nation's history than Westmoreland and Portland. Owned by the residents rather than by the city and governed by a board of trustees responsible for lighting, sewers, roadways, security, landscaping, and refuse removal, Westmoreland and Portland are lined with spectacular houses in the style of Italian palazzi, French chateaus, and English country estates. The residents of Westmoreland and Portland have run many of the largest businesses and industries in St. Louis and in many cases in the United States. In 1904 they were among those who planned one of the most spectacular world's fairs ever, and in 1927 they helped finance Charles Lindbergh's transatlantic flight. They served in the cabinets of presidents Cleveland, McKinley, Theodore Roosevelt, Taft, Wilson, Coolidge, and Hoover. By examining these and many other accomplishments of these families, Julius Hunter provides a unique historical perspective on the past century of American life. In addition to providing the historical background, Hunter presents vivid descriptions of glamorous social occasions in Westmoreland and

Portland--weddings, balls, even funerals--and he shows that the residents were sometimes united, and sometimes split, by bonds of family, marriage, religion, club membership, and political preference. Interviews with people who lived on those streets early in this century provide a unique glimpse of what it was like to grow up in the prestigious neighborhood. Hunter's text is superbly illustrated. More than 200 color photographs depict the houses as they appear today, including architectural details and interior views. More than 200 black-and-white photographs provide a glimpse of St. Louis's past. Every house that has stood in either Westmoreland or Portland is shown. All of these mansions were designed by architects, many of them of national or international reputation, and an essay by Esley Hamilton supplies additional information on the architects and the styles in which they worked. A Chronology of Owners presents the ownership dates for every resident, past and present. The engaging text and the beautiful illustrations combine to make this book pleasurable reading for everyone interested in either the St. Louis of the past or the city of the present.

"Look at today's superachievers in business, technology, the arts, sports, and politics. What were they like as children and teens, and what brought out their incredible talents? This book discusses racial segregation in American cities. Using St. Louis as a point of departure, it examines the causes and consequences of residential segregation, and proposes potential mitigation strategies. While an introduction, timeline and historical overview frame the subject, nine topic-specific conversations – between invited academics, policy makers and urban professionals – provide the main structure. Each of these conversations is contextualized by a photograph, an editor's note and an essay written by a respected current or former St. Louisan. The essayists respond to the conversations by speaking to the impacts of segregation and by suggesting innovative policy and design tactics from their professional or academic perspective. The purpose of the book, therefore, is not to provide original research on residential segregation, but rather to offer a unique collection of insightful, transdisciplinary reflections on the experience of segregation in America and how it might be addressed.
